

Wireless Security Cameras

CrystalVision Wireless CCTV:

Our **CrystalVision** wireless CCTV system combines the crystal-clear image quality of high-resolution hardwired cameras with the convenience and versatility of wireless.

The system pictured here includes a very rugged weatherproof high resolution colour camera with a built-in transmitter and infra-red lighting. Connect this to a battery (or preferably a mains adaptor for continual operation) and it will send video footage to the receiver, which connects directly to your TV. The maximum range between camera and receiver using the small stub antennas is 80m without obstructions in the signal path. This can be increased using the booster antennae below. The basic system comes in at just **£175** + VAT complete.

It comes in single or multi-channel versions. A 4-channel receiver is supplied as standard, and will accommodate up to four cameras.

The range quoted assumes ideal conditions. Obstructions in the signal path will reduce range. Antennas are available to extend range to 1km as described below.

Long-range yagi antenna - **£50**.

Plugs directly into the camera or receiver and increases reception range to around 400m. Adding this yagi to the camera *and* receiver will boost range to around a kilometre.

Recording Footage:

Images can be recorded on a digital video recorder (DVR), which stores footage on a built-in hard disk. This can be configured to record continually or only when activity is detected by the on-board motion detection. Live and recorded pictures may also be viewed over LAN or ADSL (broadband) connection from anywhere in the world. Call for DVR options, as we have a wide range available.

All systems are dispatched with all necessary power adaptors and leads for connection to TV.

Prices:

Single-camera system (one camera and 4-channel receiver) - **£175**
Additional cameras - **£125** each
4-channel DVR - **£200**
Long-range (500m) receiving / transmitting aerial - **£50**

For extended range systems, or if you have any queries, please call...
